

Questions and responses for 18-3531 RFQ for Architectural Services for the Design of the Justice Building

Questions:

1. I understand you have been working with “720 Design” out of Dallas as a “consultant on the design plan”. What specific information have they provided and specifically will their roll be in the project moving forward?
2. Are they providing space needs assessment and programming or have they completed a conceptual design? Are they to remain as a design consultant throughout the project and the RFQ is soliciting a local component to provide construction documents and site observation or is the RFQ pursuing a design team to provide full project management including design, construction documents and construction administration?

Answers:

1. The needs assessment has been conducted in house to this point. 720 Design is contracted as a consultant on the design plan and will work with us throughout the project.
