

I-30 Construction and River House

North Little Rock, Arkansas (September 21, 2020) - The Arkansas Department of Transportation has begun prepping for construction on the Interstate 30 bridge. This prepping includes creating a staging area and construction zone that is adjacent to the River House. The construction zone has removed some of the parking and open space area between the River House and I-30 (see images below). The River House will remain open and available for rentals. Access to and from the River House will be via Olive Street only.
